TypeScript	SASS	UI/UX	Figma	MUI	Bootstrap
Git	Java	jQuery	C	PHP	API

WORK EXPERIENCE

Frontend Developer Intern at **Hybrowlabs Technologies** (February 2023 – July 2023)

- Constructed and optimized 2+ interactive, responsive web apps, resolving UI bugs in 3+ existing sites.
- Employed 20+ frontend test cases using Playwright to ensure robust functionality.
- React JS, Redux, Angular, Next JS, Frontend Development, CSS, Playwright.

Web Developer Intern at **M&L Consulting Private Limited** (April 2021 – May 2021)

- Created and improved 3+ company websites for mobile responsiveness using Bootstrap, and integrated diverse functionalities through JavaScript and jQuery.
- JavaScript, HTML, CSS, Bootstrap, jQuery.

PROJECTS

Boot Bazaar (React JS, SASS) https://boot-bazaar.netlify.app/

- Constructed a feature-rich e-commerce platform showcasing over 60 footwear products.
- Emphasized responsive design for optimal viewing on 10+ devices.
- Executed and improved intuitive browsing, sorting, and 5+ filtering options to facilitate efficient product discovery.

Quiz Network (MERN, SASS) https://quiz-network-lhfp.onrender.com/

- Crafted a quiz platform featuring 4+ distinct sections. Applied secure user registration, login, and profile management.
- Enabled effortless addition and editing of objective questions with 4 options for quizzes.
- Optimized the quiz creation process, mandating a minimum of 5 questions. Integrated result display and a ranking system.

PollsXtreme (React JS, Firebase, CSS) https://polls-xtreme.netlify.app/

- Engineered a polls platform with 3+ pages with interactive question format.
- Structured and organized the platform with 3 distinct poll phases - Live, Upcoming, and Closed, ensuring user experience.
- Established a point-based reward system, granting 100 points for accurate predictions.

TagsNote (React JS, Firebase, SASS) https://tags-note.netlify.app/

- Created a comprehensive notes application featuring 3+ sections, each catering to distinct needs.
- Focused on 2 features such as user account creation using email verification and password reset functionality.
- Enabled easy note organization by allowing users to create, update, and delete notes using labels and 2+ tags for simplified note sorting.

IPL Edge (React JS, SASS) https://ipl-edge.netlify.app/

- Built an IPL game featuring 10 teams and featuring 4 levels of game selection.
- Enforced realistic game dynamics, such as toss simulation, random run generation by mixing of 4+ different arrays, and detailed scorecards for an authentic cricket experience.
- Formulated an algorithm to strategically select the best playing 11 out of 25 available players.

TRAININGS

- **Core Java** (Internshala Trainings, 6 Weeks, July 2022)
- **React JS** (Internshala Trainings, 6 Weeks, June 2021)
- **SQL for Data Science** (Coursera, 4 Weeks, May 2021)
- **Angular** (Internshala Trainings, 6 Weeks, June 2020)
